Report Scope & Segmentation

Report Scope

The global interactive kiosk market was valued at US\$ 26.1 Billion in 2021, and is expected to reach US\$ 45.8 Billion by 2032. Rising demand for automated systems is driving the growth of market across geographies, as interactive kiosks facilitate smooth performance and reduce operational time of self-service machines as compared to manual services, thereby enhancing overall customer satisfaction.

Bank kiosks will likely accumulate a revenue share of 33% while vending kiosks hold around 42% market share. Moreover, self-service kiosks hold a revenue share of around 18%, providing significant growth to global market value.

Demand for bank kiosk is anticipated to grow 1.8x over the forecast period. Vending kiosks are the largest contributor to the industry, and the segment is expected to expand at 4.2% CAGR through 2032.

- Interactive kiosks offer several benefits to service providers and optimize the overall cost of businesses by reducing the labour and infrastructure setup.
- Self-service technologies help the customers to attain a service independently, without the involvement of direct service representatives.
- This provides a higher level of satisfaction to consumers by offering control over their purchase decisions.
- These major factors have led to the widespread adoption of self-service interactive kiosks among customers in urban areas.
- In order to improve urban living standards, interactive kiosks cater several valuable services, such as live transit feeds, advertising, emergency notifications, and free unlimited Wi-Fi access, to users.
